

# WELLHEAD COMPRESSION

## THE OTA COMPRESSION ADVANTAGE

### Service, Service, Service!

OTA takes pride in being trusted with your investments. We are local and available 7 days a week, 24 hours a day.

### Equipment that fits!

OTA realizes the operating costs for compression applications. In many cases the compressor you have is over-sized, which translates to higher LOE. Let OTA right-size your compression fleet.

### One-Stop-Shop!

OTA offers full-service maintenance programs, including emissions testing! We also have a large inventory of compressor and engine parts.

Different sectors of the oil and gas industry depend on various types of compressors. OTA provides custom equipment options for many of these applications.

# PRODUCT DETAILS

## NATIONAL PRESENCE • LOCAL SERVICE

OTA specializes in the lease or sale of compressor packages with up to 125 HP. Our extensive compression product-line completely covers the variety of potential applications in this range. All of our packages are customizable to meet your unique operating requirements.

### GT020E

Electric with VFD for auto-adjustment  
Utilizes KS40 compressor

Automatic features: stop, restart, bypass, dump  
Class I Division 2 option

*Contact your OTA sales representative for performance under specific conditions.*

### GT040

40 HP Natural gas package  
Utilizes KS40 compressor  
Automatic features: stop, restart, bypass, dump

Emissions compliant  
Noise abatement options

*Contact your OTA sales representative for performance under specific conditions.*

### GT075 / GT075E / GT0125

75 HP Natural gas or electric driver  
125 HP Natural gas driver  
Emissions compliant  
Noise abatement options

*Contact your OTA sales representative for performance under specific conditions.*

### GT024DD

24HP Natural gas engine  
Economical for low volume applications

Optional automatic features  
Emissions compliant

*Contact your OTA sales representative for performance under specific conditions.*

### CUSTOM COMPRESSION

Under-balanced drilling, well completion and work-over operations  
Pipeline commissioning, maintenance and testing operations

Plant and refinery operations  
Enhanced oil recovery operations  
Closed loop completion systems  
Instrument air, flare stack combustion air

*Contact your OTA sales representative for performance under specific conditions.*
